SKILLS

Programming

.HTML/CSS JavaScript TypeScript SQL NoSQL
Frameworks and Libraries:

.Angular (Angular 16+, Angular Material) Bootstrap PrimeNG Tailwind CSS Sass Node.js Express.js Nest.js
Development Tools:

.Git GitHub vscode Linux AWS
Soft Skills:

.Teamwork, Problem-solving

PROJECTOS

Landing Page Rancv:

Description: A landing page was developed with a focus on usability and attractive design. This project involved creating a page optimized to capture the attention of users, highlighting the features and benefits of the service. The landing page was designed with a modern and functional approach, aligned with the needs of the brand and its audience.
Technologies used: Angular, Angular 17
Link: Rankcv

RCpiscinas:

Description: Advising, selling, and installing purification equipment, accessories, thermal tiles, coatings, and all necessary items for pools.
Technologies Used: Bootstrap, PrimeNG, Angular, Node.js, Express, Java Spring Boot, Vercel
Link: RCpiscinas
GitHub: Repositorio

Delatinos:

Description: Platform for Latinos living abroad who want to buy products from their home countries. This project is part of the NoCountry Selection stage.
Technologies Used: Angular, Bootstrap, PrimeNG, Java Spring Boot, Java Security
Link: Delatinos
GitHub: Repositorio

Proyección 3D BIC SAS

Description: Specializes in developing projects based on mechanical design, simulation, and stress analysis.
Technologies Used: Angular, PrimeNG, Bootstrap, AWS
Link: Proyección 3D BIC SAS
GitHub: Repositorio

LANGUAGES

Spanish: Native

English: A1

Brazilian Portuguese: B1

SUMMARY

Full Stack Developer specialized in Angular 16+ with 2 years of experience in startups and freelance projects. Proficient in a variety of languages and frameworks, including Node.js with Express and Nest. Knowledgeable in Linux, SQL and NoSQL. I have optimized web applications, participated in project launches and have experience in agile methodologies and code review. Passionate about creating efficient and scalable solutions.

EXPERIENCE

software developer   April 2023 - present
Rankcv

- Developed web applications using Angular 16+.
- Led training and selection of specialized personnel for tech industries.
- Collaborated with multidisciplinary teams to ensure code quality and timely delivery.

Software Developer

Latinhack   September - 2023 - present

- Developed and maintained frontend web applications using Angular.
- Closely collaborated with the backend team to integrate APIs and services.
- Contributed to the successful launch of various web applications, improving customer satisfaction by optimizing interfaces and functionalities.

Desarrollador de software   *junio 2023 - agosto 2023*

No Country Independiente (simulación de trabajo argentina)

- Desarrollo de aplicaciones web frontend utilizando Angular.
- Colaboración estrecha con el equipo de backend para integrar APIs y servicios.

EDUCATION

software foundation   *09/2021-09/2022*

Holberton School

Project-based, peer-learning and self-learning methodology, hourly intensity of 1900 hours, with emphasis on software fundamentals and web development.

Full Stack   *09/2022-09/2023*

Holberton School

Project-based, peer-learning and self-learning methodology, hourly intensity of 1900 hours, with emphasis on frontend and backend.

Ingeniería electrónica

institución universitaria Antonio José Camacho   01/2018 - 12/2021

With emphasis on presenting solutions using knowledge of both digital electronics and industrial electronics that meet the requirements.

Cursos

PostgreSQL Course: Platzi, December 2023

Angular Router Course: Lazy Loading and Modular Programming: Platzi, June 2023

REST API Consumption with Angular Course: Platzi, May 2023

Angular Fundamentals Course: Platzi, April 2023

TypeScript Fundamentals Course: Platzi, March 2023

Professional Git and GitHub Course: Platzi, January 2023

Frontend Developer Course: Platzi, July 2022

Angular from Zero to Expert Course: Udemy, April 2024

Various Courses: YouTube, 2022 - 2024
